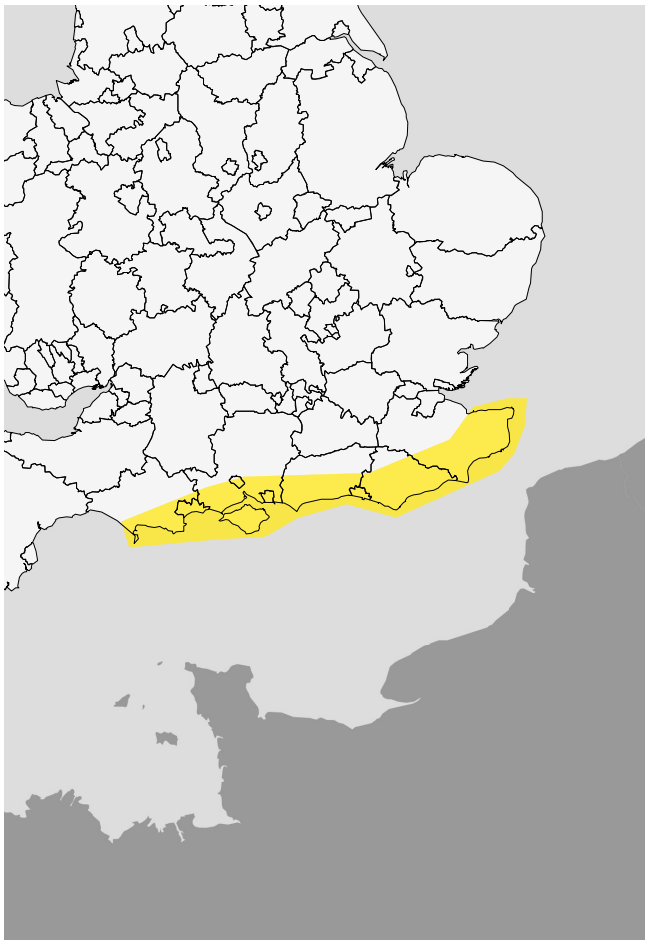
Yellow warning
Wind

Between
00:00 Tue 1 Nov 2022 and
08:00 Tue 1 Nov 2022



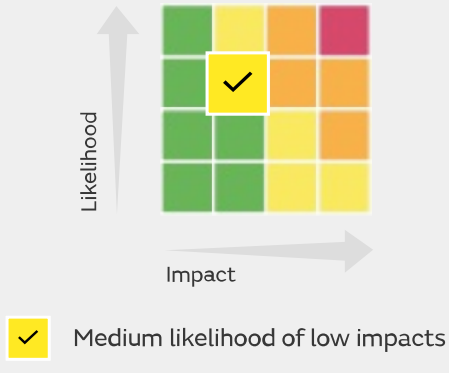
Strong winds will develop overnight bringing a risk of disruption.

What to expect

- Some delays to road, rail, air and ferry transport are likely
- Delays for high-sided vehicles on exposed routes and bridges likely
- Some short term loss of power and other services is possible
- It's likely that some coastal routes, sea fronts and coastal communities will be affected by spray and/or large waves

Further details

A small area of low pressure, named Storm Claudio by Meteo France, will move eastwards through the English Channel bringing a spell of strong to gale force winds. While the strongest winds are expected over the Channel Islands and northern France, parts of southern England may well see gales for a time overnight. Southerly winds will strengthen before veering westerly and are expected to gust to 50-60 mph, especially over coastal areas, with a risk of isolated coastal gusts to 70 mph.



✓ Medium likelihood of low impacts
